WE > ME

I **believe** that education is not a job, but education is a **lifestyle**. In my mind it takes a **family** to be successful.

During my time as Superintendent, my family and I will be **involved** and **visible** not only within the school but also the **community** as a whole. As a leader, you are a role model and must be active in all facets of the school to inspire and support students to become the best citizens and people that Nebraska has to offer.

My **number** one item of importance is **relationships** and how they help a school system be successful.

Therefore, I will be **committed** to **positively** building and maintaining both professional and personal relationships with students, parents, staff, community, and all stakeholders.

I am **intentional** with all communication, reflection, and professional development.

Therefore, I will **listen**, **collaborate**, and **communicate** effectively with all stakeholders.

I strive to intentionally **empower** and **inspire** those around me to develop their skills in order to reach maximum potential.

Therefore, I will have **high expectations** for my coworkers, my students, and especially myself.

At all times, I will show how important **integrity** is for a positive school setting.

Therefore, I will **work hard** daily to lead from the front when necessary, and foster leadership to building capacity within my staff so they will do the same.
